

# SMART PIPE-SHOP AUTOMATION

**STOP RUNNING MACHINES. START RUNNING A SYSTEM.**

3R solutions designs and delivers fully integrated pipe shop solutions tailored to your requirements. From concept to commissioning, 3R acts as your single point of responsibility, combining our expertise with world-leading OEM technologies in cutting, welding, and other processes, supported by a powerful, integrated software framework. The result: a seamlessly connected system instead of isolated machines.

Automated material flow, synchronized processes, and customized software ensure:

- Continuous production without bottlenecks
- Full transparency across all operations
- Consistent quality with reduced manual intervention
- Significantly increased efficiency and output

With over 40 years of experience, 3R solutions has finished projects around the globe.

Ready to outperform your competition? Let's build your next-generation pipe shop!
